Conflict Minerals Policy

Marque Magnetics 2000 Ltd supports the supply chain initiatives and overall corporate social responsibility efforts that work towards avoiding the use of 3TG minerals (Tantalum, Tin, Tungsten, and Gold) purchased from sources whose revenue is believed to finance or benefit armed groups who commit human rights abuses in the Democratic Republic of the Congo and adjoining countries.

Marque Magnetics 2000 Ltd is committed to being a responsible corporate citizen and is taking the required steps in avoiding the use of these Conflict Minerals. We are committed to complying with any requirements applicable to our company under the Conflict Minerals Rule.

Marque Magnetics 2000 Ltd uses one of these materials, specifically Tin, in the solder used to manufacture our products, as it is required for the functional performance of the same. Marque Magnetics 2000 Ltd does not purchase these metals directly from the smelters or mines, so we rely on the source information provided by our longstanding suppliers. We are working closely with these suppliers to trace minerals back to their origin in order to ensure responsible sourcing.
